

## Car Air Disinfection System

Start your journey with Fresh Air

## Pollutants in the Car

Food Smell

Pet odour

Air conditioning dust mite

Bacteria & Viruses in steering wheel

Smoke odour

Formaldehyde in cushion cover

Most of you invest plenty of time in your car for long commute each day. Regular usage of car, filled with many unseen bacteria, viruses, odour and other contaminants which become more intense if you don't clean it right away. But how do you make the car air cleaned ?

## Breathe Fresh Air with Faraday's Car Air Disinfection System

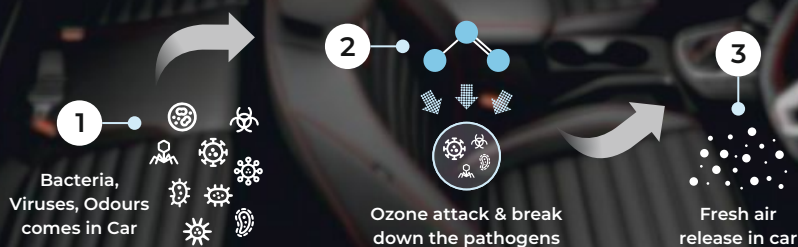

Car Air Disinfection System, an innovative creation of Faraday Ozone which doses activated oxygen to eliminate any kind of bacteria, viruses, odours, germs, airborne pathogens and other contaminants present in the car and makes your journey better with fresh air throughout the day.

It has a display with inbuilt timer and one start switch which is easy to use and convenient to operate, just plug and start the machine that disinfects your car in jiffy using ozone.

### Benefits:

- Destroys bacteria, viruses, odours and micro organisms inside the car
- Works on activated oxygen technology for an filtration free operation
- Process of disinfection is completely natural and chemical free
- No costly filters to replace or maintain thus it is zero maintenance
- Compact in size - Handheld - Placed it anywhere in the car

# How Ozone Disinfects your Car

## Salient Features

- **360° Purification** : Ozone reaches every corner of the car by using speedy fan and circulate it to disinfects the overall car quickly
- **Smart Display** : Allows you to select timing from 5 to 60 minutes for the disinfection process and indicates the treatment running time
- **Performs Effectively** : Our patented ozone technology generates safe level of ozone to treat the air and decomposes back to oxygen quickly
- **Easy to Move** : Handheld holder to move easily and use switch directly to run the machine unless you want to change the treatment time.

## Product Specifications

| MODEL          | INPUT POWER | POWER CONSUMPTION | OZONE CAPACITY | IDEAL FOR     | DIMENSION (L x W x H) mm | WEIGHT |
|----------------|-------------|-------------------|----------------|---------------|--------------------------|--------|
| Instaclean 50  | 12 V DC     | 15 W              | 400 mg/hr      | 3 Cars / day  | 111 x 303 x 200          | 2.7 Kg |
| Instaclean 100 | 12 V DC     | 18 W              | 800 mg/hr      | 10 Cars / day | 151 x 353 x 230          | 4.8 Kg |

Established in 1996, We design and manufacture Ozone Generator for air purification, water and waste water treatment systems, Electrical Incinerator and Vending Machine and its Accessories. With over 24 years of expertise, our products presence in 50+ countries that are widely accepted by leading companies worldwide.

## Global Footprint in 50+ Countries
